The loans compiled in KPB Report 6 are those records that have been geo-coded and reported down to the census tract level. In every county there are a small number of loans that are geocoded only to the county level. These loans are reported by lender by county and are included in KPB Report 8 that depicts the market rank and market share of all reporting lenders by county. Therefore there will be a small disparity between the totals in KPB Report 6 and KPB Report 8.
